300-mA Output, High PSRR, Low-Dropout Linear Regulator

Features

- Input Voltage Range: 2.4 V to 5.5 V
- Output Voltage Options:
  - Fixed Voltage: 1.2 V, 1.5 V, 1.8 V, 2.5 V, 2.8 V, 3 V, 3.3 V
  - Adjustable Voltage: 0.8 V to 5 V
- High Output Accuracy:
  - ±1% Typical Under Room Temperature
  - ±2% Through Operating Conditions
- Maximum Output Current: 300 mA
- Low Dropout Voltage: 200 mV at 300 mA
- Low Quiescent Current and Shutdown Current
- Foldback Current Limit and Thermal Protection
- Stable with 2.2-µF Ceramic Capacitor
- Inrush Input Current Limitation During Start-up
- Thermal Shutdown Protection
- Junction Temperature Range: −40°C to +125°C
- Package Options: SOT23-5, SOT353-5 (SC70-5), DFN1×1-4

Description

The TPL730 series is a high-performance and low-dropout linear regulator. The TPL730 series supports a maximum 300-mA output current with a low-quiescent current and high PSRR. The TPL730 series of products is stable with ceramic output capacitors from 2.2 µF to 10 µF.

The TPL730 series of products has a high PSRR with 60 dB at 1 kHz. This feature makes the TPL730 series very suitable for power-sensitive applications with high noise from the previous stage power supply. A quiescent current of as low as 49 µA and an only 20-nA shutdown current make the TPL730 series an ideal choice for portable devices with a battery power supply. The current limit foldback and thermal overload protection circuits improve reliability under heavy load conditions.

The TPL730 series provides several output voltage version options including the fixed version and the adjustable version with ±2% output voltage accuracy over operating conditions. The TPL730 series is guaranteed over the junction temperature range from −40°C to +125°C.

Applications

- Handheld Devices with Battery Power Supply
- POS
- Video Surveillance
- Wireless and IoT modules

Revision History

Date	Revision	Notes
2018-09-18	Rev.Pre.0	Preliminary version.
2018-11-26	Rev.A.0	Initial released version.
2019-02-11	Rev.A.1	1. Added the SC70-5 package. 2. Added voltage options of 1.5 V, 2.7 V, and 2.9 V. 3. Added the link to Figure 11 and Figure 12.
2020-08-15	Rev.A.2	1. Changed the “Soft-start Limits Input Current Surge During Enable” to “Inrush Input Current Limitation During Start-up”. 2. Added the power dissipation limitation. 3. Added the description of “Short-Circuit Protection”.
2021-03-09	Rev.A.3	1. Corrected the typical value of the current limit in the Feature Description. 2. Added Tape and Reel Information. 3. Updated Junction Temperature Range.
2022-05-08	Rev.A.4	Corrected the test condition in the Electrical Characteristics table.
2022-08-21	Rev.A.5	Corrected the pin number of the SC70-5 package.
2024-10-10	Rev.A.6	1. Removed voltage options of 2.7 V and 2.9 V. 2. Updated recommended C_{BP} range for adjustable output version

Table 1. Pin Functions

Pin No.			Name	I/O	Description
SOT23-5	SOT353-5 (SC70-5)	DFN1×1-4			
1	1	4	IN	I	The input voltage pin. Bypass IN to GND with a 1-μF or greater capacitor.
5	5	1	OUT	O	The regulated output voltage pin. Bypass OUT to GND with a 2.2-μF or greater capacitor.
3	3	3	EN	I	The regulator enable pin. Drive EN high to turn on the regulator; drive EN low to turn off the regulator. For the automatic startup, connect EN to IN directly.
2	2	2	GND	-	The ground reference pin. Connect the GND pin to the PCB ground plane directly.
4	4	-	NC	-	Not connected.
4	4	-	FB	I	The output feedback pin (adjustable version only). Connect to a resistor divider to adjust the output voltage. And connect C_{BP} with capacitance from 1nF 200nF between FB and OUT.

(1) The thermal pad must be connected to the PCB ground plane to maximize the thermal performance.

Specifications

Absolute Maximum Ratings

Parameter		Min	Max	Unit
V_{IN}, V_{EN}	Input Voltage	−0.3	6	V
V_{OUT}	Output Voltage	−0.3	6	V
V_{FB}	Feedback Voltage (Adjustable Version only)	−0.3	6	V
T_J	Maximum Operating Junction Temperature	−40	150	°C
T_{STG}	Storage Temperature Range	−65	150	°C
T_L	Lead Temperature (Soldering, 10 sec)		260	°C

(1) Stresses beyond those listed under Absolute Maximum Ratings may cause permanent damage to the device. Exposure to any Absolute Maximum Rating condition for extended periods may affect device reliability and lifetime.
(2) All voltage values are with respect to GND.

ESD, Electrostatic Discharge Protection

Symbol	Parameter	Condition	Minimum Level	Unit
HBM	Human Body Model ESD	ANSI/ESDA/JEDEC JS-001 (1)	±8	kV
CDM	Charged Device Model ESD	ANSI/ESDA/JEDEC JS-002 (2)	±2	kV

(1) JEDEC document JEP155 states that 500-V HBM allows safe manufacturing with a standard ESD control process.
(2) JEDEC document JEP157 states that 250-V CDM allows safe manufacturing with a standard ESD control process.

Recommended Operating Conditions

Parameter		Min	Max	Unit
V_{IN}	Input Voltage	2.4	5.5	V
V_{EN}	Enable Voltage	0	V_{IN}	V
V_{OUT}	Output Voltage	0	5	V
V_{FB}	Feedback Voltage (Adjustable Version Only)	0	V_{OUT}	V
I_{OUT}	Output Current	0	300	mA
P_D	Power Dissipation (SOT23-5 Package)	0	300	mW
	Power Dissipation (SOT353-5 (SC70-5) Package)	0	300	mW
	Power Dissipation (DFN1×1-4 Package)	0	300	mW
C_{OUT}	Output Capacitor	2.2	10	μF
C_{BP}	Bypass Capacitor	1	200	nF
T_J	Operating Junction Temperature Range	−40	125	°C

Thermal Information

Package Type	θ_{JA}	θ_{JC}	Unit

I_{CL}	Output Current Limit	V_{OUT} = 0.9 × $V_{OUT\ (NOM)}$	350	1000	1400	mA
Regulated Output Voltage and Current						
PSRR	Power Supply Rejection Ratio (Fixed Version)	I_{OUT} = 100 mA, f = 1 kHz		60		dB
		I_{OUT} = 100 mA, f = 100 kHz		40		dB
		I_{OUT} = 100 mA, f = 1 MHz		40		dB
	Power Supply Rejection Ratio (ADJ Version)	I_{OUT} = 100 mA, f = 1 kHz, C_{BP} = 100 nF		65		dB
		I_{OUT} = 100 mA, f = 100 kHz, C_{BP} = 100 nF		60		dB
		I_{OUT} = 100 mA, f = 1 MHz, C_{BP} = 100 nF		45		dB

Symbol	Parameter	Conditions	Min	Typ	Max	Unit
V_N	Output Noise Voltage (Fixed Version)	I_{OUT} = 100 mA, BW = 100 Hz to 80 kHz		130		μV_{RMS}
	Output Noise Voltage (ADJ Version)	I_{OUT} = 100 mA, BW = 100 Hz to 80 kHz, C_{BP} = 100 nF		40		μV_{RMS}
T_{STR} (2)	Start-up Time (Fixed Version)	I_{OUT} = 300 mA, C_{OUT} = 2.2 µF		150		µs
	Start-up Time (ADJ Version)	I_{OUT} = 300 mA, C_{OUT} = 2.2 µF, C_{BP} = 100 nF		15		ms
Temperature Range						
T_{SD}	Thermal Shutdown Temperature			170		ºC
	Thermal Shutdown Hysteresis			30		ºC

(1) Dropout voltage is the minimum input-to-output voltage differential needed to maintain regulation at a specified output current. In dropout, the output voltage will be equal to $V_{IN} - V_{DROPOUT}$.

(2) The start-up time from EN assertion to 0.98 × $V_{OUT\ (NOM)}$.

Typical Performance Characteristics

All test conditions: V_{IN} = $V_{OUT\ (NOM)}$ + 0.5 V or 2.4 V, whichever is greater; C_{OUT} = 2.2 µF, T_A = +25℃, unless otherwise noted.

Detailed Description

Overview

The TPL730 series of devices is a 300-mA high PSRR, low-dropout linear regulator with a very low quiescent current. It operates from 2.4 V to 5.5 V and consumes a quiescent current of 49 μA at no load and only 20 nA in shutdown mode.

The TPL730 series is available in fixed voltage versions of 1.2 V, 1.5 V, 1.8 V, 2.5 V, 2.8 V,3 V, and 3.3 V, and adjustable voltage versions of 0.8 V to 5 V with ±2% output voltage accuracy over operating conditions.

Functional Block Diagram

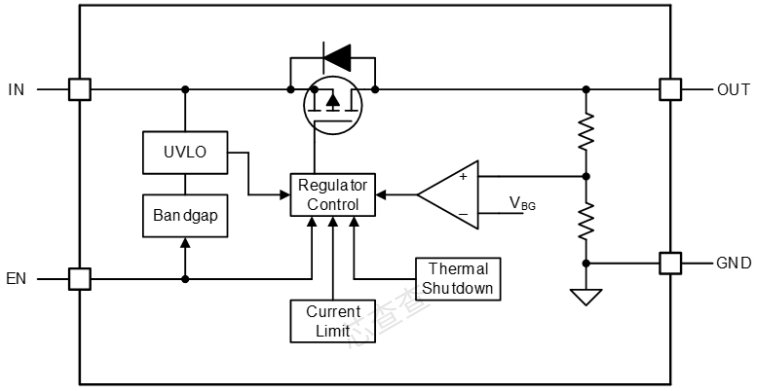

Figure 13. TPL730 Series Fixed Output Version

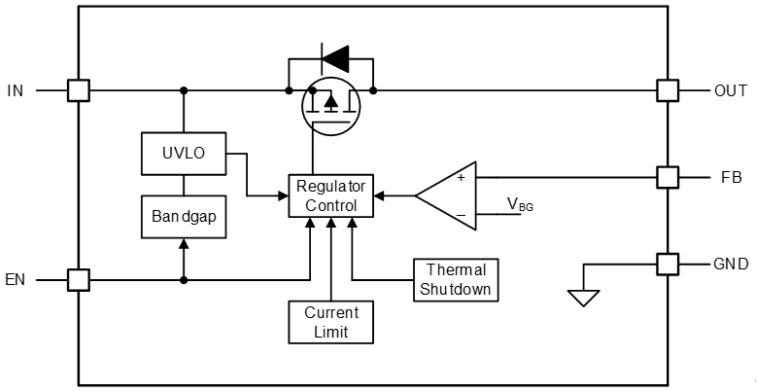

Figure 14. TPL730 Series Adjustable Output Version

Feature Description

Enable

The enable pin (EN) is active high. Connect this pin to the GPIO of an external processor or digital logic control circuit to enable and disable the device. Or connect this pin to the IN pin for self-bias applications.

Under-Voltage Lockout (UVLO)

The TPL730 series uses an under-voltage lockout circuit (UVLO = 1.9 V) to keep the output shut off until the internal circuitry operates properly.

Regulated Output Voltage

The TPL730 series is available in fixed voltage versions of 1.2 V, 1.5 V, 1.8 V, 2.5 V, 2.8 V, 3 V, and 3.3 V. When the input voltage is higher than $V_{OUT\ (NOM)}$ + V_{DO} or 2.4 V, the output pin is the regulated output based on the selected voltage version. When the input voltage falls below $V_{OUT\ (NOM)}$ + V_{DO} or 2.4 V, the output pin tracks the input voltage minus the dropout voltage based on the load current. When the input voltage drops below the UVLO threshold, the output keeps shut off.

Adjustable Output Voltage

The TPL730 series is also available in adjustable voltage versions of 0.8 V to 5 V by selecting suitable external resistor dividers. Use Equation 1 to calculate the output voltage (V_{FB} = 0.8 V). Selecting the resistor value of (R1 + R2) between 10 kΩ and 100 kΩ is suggested.

$$V_{OUT} = V_{FB} \times \left(1 + \frac{R1}{R2}\right) \quad (1)$$

Current Limit

The TPL730 series integrates an internal foldback current limit that helps to protect the regulator during fault conditions. When the output is shorted, the LDO supplies a typical current of 1000 mA. The output voltage is not regulated when the device is in current limit and is $V_{OUT} = I_{CL} \times R_{LOAD}$.

Short-Circuit Protection

The TPL730 series integrates the short-circuit protection. When the output pin is shorted to ground or forced to a voltage below 0.2 V, the output current of the TPL730 series is limited to a typical value of 150 mA.

Thermal Shutdown

During normal operation, the LDO junction temperature should not exceed 125°C. When the junction temperature exceeds the thermal shutdown threshold, the LDO shuts down the output immediately. Until when the junction temperature falls below the thermal shutdown threshold minus thermal shutdown hysteresis, the output turns on again.

Application and Implementation

> Note
>
> Information in the following application sections is not part of the 3PEAK's component specification and 3PEAK does not warrant its accuracy or completeness. 3PEAK's customers are responsible for determining suitability of components for their purposes. Customers should validate and test their design implementation to confirm system functionality.

Application Information

The TPL730 series of devices is a 300-mA high PSRR, low-dropout linear regulator with a low quiescent current. The following application schematic shows a typical usage of the TPL730 series.

Typical Application

Figure 15 and Figure 16 show the typical application schematic of the TPL730 series.

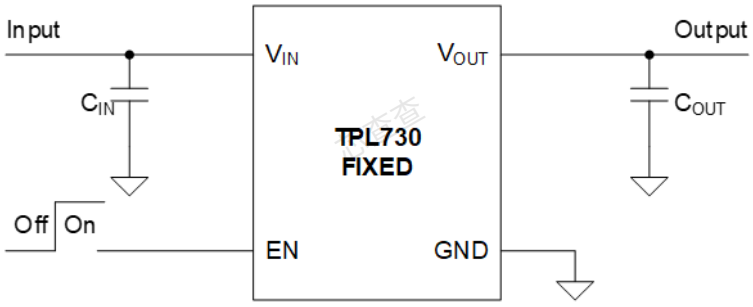

Figure 15. TPL730 Fixed Output Voltage

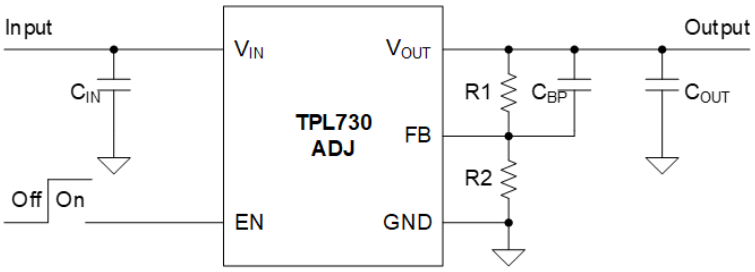

Figure 16. TPL730 Adjustable Output Voltage

Input Capacitor and Output Capacitor

3PEAK recommends adding a 1-μF or greater capacitor with a 0.1-μF capacitor in parallel at the IN pin to keep the input voltage stable. The voltage rating of the capacitors must be greater than the maximum input voltage.

To ensure loop stability, the TPL730 series requires an output capacitor with a minimum effective capacitance value of 2.2 μF. 3PEAK recommends selecting an X5R- or X7R-type ceramic capacitor with low ESR over temperature.

The TPL730 adjustable output version requires a bypass capacitor C_{BP} with a capacitance value from 1nF to 200nF to ensure loop stability.

All capacitors must be placed as close to the pins of the device as possible.

Power Dissipation

During normal operation, the LDO junction temperature should not exceed 125°C. Use the below equations to calculate the power dissipation and estimate the junction temperature.

The power dissipation can be calculated using Equation 2.

$$P_D = (V_{IN} - V_{OUT}) \times I_{OUT} + V_{IN} \times I_{GND} \quad (2)$$

The junction temperature can be estimated using Equation 3. θ_{JA} is the junction-to-ambient thermal resistance (See Thermal Information).

$$T_J = T_A + P_D \times \theta_{JA} \quad (3)$$

Layout

Layout Guideline

- Both input capacitors and output capacitors must be placed as close to the pins of the device as possible.
- It is recommended to bypass the input pin to ground with a 0.1-μF bypass capacitor. The loop area formed by the bypass capacitor connection, the IN pin, and the GND pin of the system must be as small as possible.
- It is recommended to use wide trace lengths or thick copper weight to minimize I×R drop and heat dissipation.

TPL730F25-FR	−40 to 125°C	DFN1x1-4	L6G	3	Tape and Reel, 12,000	Green

Order Number	Operating Temperature Range	Package	Marking Information	MSL	Transport Media, Quantity	Eco Plan
TPL730F28-FR	−40 to 125°C	DFN1x1-4	L6H	3	Tape and Reel, 12,000	Green
TPL730F30-FR	−40 to 125°C	DFN1x1-4	L6I	3	Tape and Reel, 12,000	Green
TPL730F33-FR	−40 to 125°C	DFN1x1-4	L6J	3	Tape and Reel, 12,000	Green

(1) For future products, contact the 3PEAK factory for more information and samples.

Green: 3PEAK defines "Green" to mean RoHS compatible and free of halogen substances.

IMPORTANT NOTICE AND DISCLAIMER

Performance Information. Performance tests or performance range contained in this document/material are either results of design simulation or actual tests conducted under designated testing environment. Any variation in testing environment or simulation environment, including but not limited to testing method, testing process or testing temperature, may affect actual performance of the product.

Disclaimer. 3PEAK provides technical and reliability data (including data sheets), design resources (including reference designs), application or other design recommendations, networking tools, security information and other resources "As Is". 3PEAK makes no warranty as to the absence of defects, and makes no warranties of any kind, express or implied, including without limitation, implied warranties as to merchantability, fitness for a particular purpose or non-infringement of any third-party's intellectual property rights. Unless otherwise specified in writing, products supplied by 3PEAK are not designed to be used in any life-threatening scenarios, including critical medical applications, automotive safety-critical systems, aviation, aerospace, or any situations where failure could result in bodily harm, loss of life, or significant property damage. 3PEAK disclaims all liability for any such unauthorized use.
